Benefits

Ease of Use

The touch screen interface allows non-technical users to access SAP data. No transaction codes are required.

Mobile access

Your sales people can enter sales orders while visiting with your clients. Provide real-time data to managers across your business.

More Freedom

Your workers do not need to sit at a desk to access SAP. They can access corporate data from meeting rooms, the production floor or their car. No need to start a laptop to access SAP data.

Speed

Get to information within seconds using your mobile device.

Connecting the iPhone, iPad or Android to SAP

The iPhone, iPad and Android support VPN and Wi-Fi networks for connection to your corporate network. Once the device is connected, the Cohesion Mobile application connects directly to your SAP server. The software can be quickly installed on your ECC system with a single transport. No additional hardware or network configuration is required.

SAP versions supported

ECC 6.0, ECC 5.0 & ERP 4.7. The system uses the standard SAP web server built into ECC 6.0. Prior versions are supported via ITS (SAP Internet Transaction Server).
